

Promising a Better Life.

In-depth personalised counselling | Choose Your Stream

CLASS 9-10

Select subjects of specialization.

- Chalk out the roadmap to graduation, postgraduation, and occupation.
- Select educational streams.

9th and 10th are the real beginning of long professional journey.

- What we choose as optimum professions should align with who we are; what we like doing; and what our approach to life is. It should not be just one profession but basically what all things we can do successfully. This is the key to being happy and enjoying life for long.
- World needs varied and all kind of skill sets and all of them are personally and professionally rewarding when they are aligned to who you are, what you like and what your lifestyle approaches are.
- For example, are you **Thinker (Investigative) & Creator (Artistic)** who is interested in Anthropology, then you may find that working in UX at names like Google is what makes you happy and pays well. You may be **Persuader (Enterprising) and Helper (Social)** and may be happy running a business that focuses on helping others (like a chain of schools or education consulting).
- We help you understand your **THEME CODE** and refine it further with other psychometric scales from your report.
- We help you discover your ideal career description in terms of key skills and knowledge needed and their attractiveness in terms of money and what the career brings to you. We align this information with your Personality, Interest Scales and Personal Style Scales so that your report is truly customized to help you prepare for your future.

- We help you choose your educational stream. This is keeping in mind the Chalked-out roadmap to graduation, post-graduation, and occupation and also helps you understand other good options customised for you.
- This includes helping you decide what subjects to study and what levels of particular subjects (E.g. Basic Math or Advanced Math).
- We help you understand your learning style and which of your innate (inborn) multiple intelligences will help you learn better, and in an easy and relaxed manner.

- We help you understand that which of your hobbies can evolve into a vocation based on your top Interest Scales and your innate relative strengths and potential.
- We help you understand your natural strengths so that you can develop them further. Similarly, you get a peek into some natural shortcomings and use that information to either work on them or around them.
- Knowing your lifestyle approach, who you are and how you learn and communicate helps you have better relationships with parents, friends and teachers.

To help you know who you are, what you like doing, what occupations are you likely to succeed in and be happy, your lifestyle choices, your inborn multiple intelligences and relative strengths of your brain lobes, we have two different options.
