

Promising a Better Life.

In-depth personalised counselling | Choose Your Stream

COLLEGE

- Discover the right FIT career
- Simplify the complex process of decision making for the most suitable career
- We help you with a contingency plan if things don't work out.

First step is to identify your career rather than choosing a course to study.

- In order to find the career that is right fit for you, you must first get in touch with your 4 P's – passion, personality, preferences (for workplace, type of work, work environment, etc.), and principles/values.
- Factors assessed for career stream selection
 1. Interests
 2. Motivation
 3. Skills
 4. Personality
 5. Innate Intelligences
- Deciding what to do after college has a significant impact on your immediate future as well as long term goals. Questions like the one's below
 1. Should I pursue Post Graduation after college?
 2. Whether to pursue it immediately after graduation or whether to gain some work experience before you choose to do so.
 3. Whether it is worth investing more time and money in that field or should you directly take up a job after graduation?

- Should I start working after graduation?

1. Challenges of transformation from student life into professional world
2. What kind of jobs to get into?
3. In case one wants to pursue a job in an unrelated field to his/her college degree? So, what's the right decision, further studies or gain experience on ground which would make learning more experiential?
We help you address these questions

- We guide you through this whole decision-making process and help to take the best possible route for you.

- We help you gain more clarity regarding the professional world, ensuring preparedness to eliminate any surprises.

- We help you find a combination of a career that taps into your passion as well as one that will be viable in the future.

- We help you identify the internships/Volunteer/Part-Time Work–Volunteer or parttime work in a field that can give you real life experience to base a career decision on.

- The knowledge that you acquire in school/college will usually point towards an industry, but we help you to find the right fit/role within that industry that best suits your personality, skills and interests. This makes you aware how your career will pan out with the choices you make. • One- Size- fits- all approach doesn't work when it comes to careers, so we help you find the RIGHT FIT.

To help you know who you are, what you like doing, what occupations are you likely to succeed in and be happy, your lifestyle choices, your inborn multiple intelligences and relative strengths of your brain lobes, we have two different options.
